REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims 1, 11, 15 and 17 include the limitation that the mop head is a rectangular parallelepiped body with the front side and a rear side comprising the long dimensions of the body and the side surfaces comprising the short dimensions of the body. There is an indentation in the side surface(s) and in the bottom surface. The indentation extends from the front surface to the rear surface of the parallelepiped body having a uniform cross section. Wheeler (USPN 3214779) teaches indentations in the side surface and the bottom surface however Wheeler does not teach a rectangular parallelepiped body. Rebernak (USPN 3038188) teaches a rectangular parallelepiped body however fails to teach that the indentations are in the side surfaces of the body. Hoyer (USPN 2413872) teaches a rectangular parallelepiped body used to clean floor molding however Hoyer fails to teach indentations in the side surfaces. Stetson (USPN 2304127) teaches a cardioid shaped mop comprising an indentation (31) that corresponds to the shape of floor molding however it would not have been obvious to one of ordinary skill in the art to combine references with Stetson since it one in the art would not know which surface of the references mop to put Stetson's indentation on.

For the above reasons, the application is free from the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
